

Base layout Skeleton:

- 3 pages
- Page 1: Introductionary page/home page
- Page 2: More Info on group
- Page 3 (or final): Meet our members

Page1: Introductory / Home:

“Vossie Devclub – Mowbray” – should be somewhere here, nice and visible

What we’re about – “trying to build a community of people who have a passion for code” ***UPDATE* → Ensure home page is insanely simplistic and “About us” is hidden until clicked or have a separate page for it**

*Temporary QR code to sign up somewhere here – “Sign up!” or something (**will change to being a webpage with a form instead**)*

Page 2: More Info

Our leaders / committee members ***UPDATE* → Have this as a link to “members” page instead OR Disregard as there is a “members” page**

Projects: Completed and current – it can be in the same section or different whatever

Events: Hosted and those we plan to host (idk if they should be the same or separate) - ***UPDATE* → “Journal” for past events?**

“What do you need to join?” – section

Club activities

Club rules

Page 3: Members:

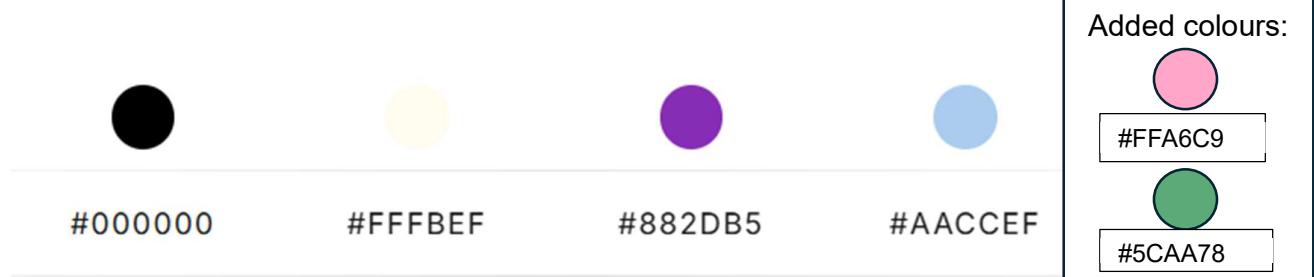

Active Members of the club:

here they can link they’re portfolios and have a small section of the website to themselves if they want to, We’ll start with the 4 committee members – and then members who are actively participating or are seen to be actually actively participating can have a section there. They can put whatever they want, a bit about themselves, they’re preferred languages, whatever.

Main Colour Theme/Palette:

Potentially, have option 1 as a theme, and allow for theme switching with option 2 - LATER

Option 1 - Original colours:

Option 2 - Poster colours: *(ENSURE TO ENCOMPASS A FULL-ON COMPUTER!)*

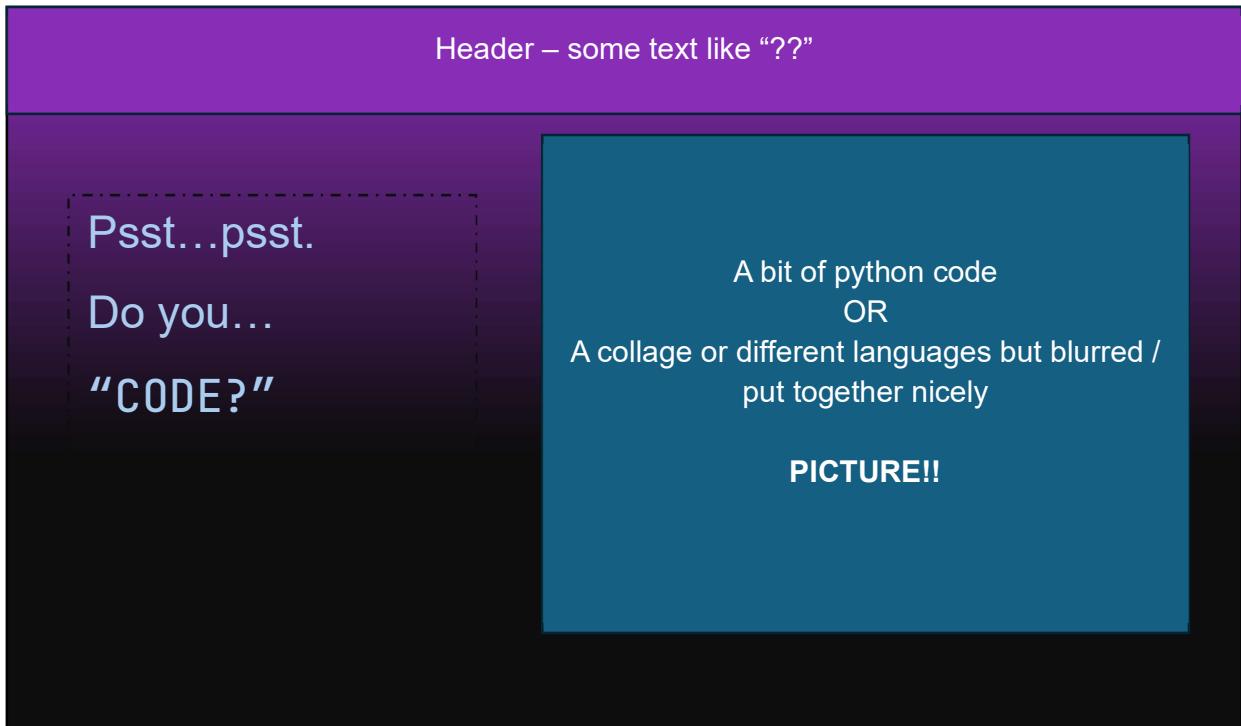

Design skeleton:

Main for all:

Home Page:

Additional CSS:

Pictures / text can slide in upon entering viewport?

QR CODE!! (temp)

***CONSULT COUNCIL* - *for text
next to this also***

Can also consult council for additional
stuff for home page!

Vossie Devclub Mowbray
Your local community built
on a passion for this
journey we call coding!

Footer – “contact details – email: #####@vossie.net – vice chair” OR smth

More info page:

Additional CSS:

More info categories are at the top of the page, either in the header or below it, nothing other than a search bar (JS) and the club origins is displayed on the page until a user presses a category from the top. When a category is selected, the club origins will “Disappear” – be **COMPLETELY** hidden, such that it seems non existent.

Additional JS:

Search bar allowing user to search common topics as a shortcut alternative to selecting a category from the top!

Logo Projects Events Activities Rules

Search bar

CLUB ORIGINS: (Under searchbar ofc)

More info about the club – here put that whole speech about what you want the club to be, whatnot, something inspiring or idk

eg. “Coding coding... it really is quite the up and down journey, sometimes it works, other times it doesn’t and you just don’t know why (in either scenario sometimes even). Ever since I started though, I never cared about coding with other people, until I finally did, this wa in highscol however and wasn’t really a club. it was an IT class which we had once or twice a week after school, a legitimate subject. Kinda ruined it a bit, but also brought me the experience of working with and alongside other people who like to code. Nothing special but that’s pretty much the reason I want to have this club going. To experience that again, a space where I can code with and alongside other people who like to code, where I can grow with them in terms of coding as we become better at this little thing we do. A space where we can struggle to understand, laugh and march forward!

Footer – “contact details – email: ####@vossie.net – vice chair” OR smth

Members Page:

Header – some text like “??”

Meet the council Members!

ChairPerson
Picture
CSS/Javascript focus

Vice Chair
Picture
CSS/Javascript focus

Project Manager 1
CSS/Javascript focus

Project Manager 2
CSS/Javascript focus

Meet the Members!

Member X
CSS/Javascript
within white border

Member Y
CSS/Javascript
within white border

Member Z
CSS/Javascript
within white border

Member E
CSS/Javascript
within white border

Suggestion layout for members:
Experience level, preferred languages, a tiny introductory, preferred project type possibly (apps, games, sites, cybersecurity whatever)?

Footer – “contact details – email: ###@vossie.net – vice chair” OR smth

CSS/JS:

On the page, where pictures are located, place pictures. HOWEVER, when the pictures are clicked, ensure to hide **everything** and to bring up the html segment of whoever is clicked. An HTML page within the members html page.

For the other members, ensure that everything within white border is hidden. Ensure white border displays on page also, smaller tho. Do not hide the council here.
